1. Strengthen the role and capacity of BiH General Secretariat, and government Secretariats on other levels of authority in BiH (hereinafter: government Secretariats), so they develop into central policy coordination units able to: • Coordinate the preparation of the government program and priorities; and monitor progress in implementing the work program, and revising it, if necessary; • Prepare the agenda of the government session; • Coordinate relations with parliament on legislation originating from the government; • Coordinate relations with other levels of government; and • Monitor the performance of ministries in meeting deadlines set in government decisions. Links to the Twining Project to the BiH General Secretariat; SIGMA reviews of central policy capacity in BiH	Establish a joint Working Group to discuss recommendations for strengthening government Secretariats' mandates, organizational structure and means, in line with improvement of government policy-making, and agreement on a common approach to the reform. 1. Strengthen the procedures for preparing items for the government. NB: Links to the reform of central policy capacity above Links to UNDP's project on Strengthening the capacity of BiH Governments representatives in Policy-making and Strategy Development	Revise procedures for preparing items for the government; paying special attention to clarifying and strengthening the procedures for: • Responding to strategic documents of the government; • Annual work planning; • Consulting external interest groups; • Inter-ministerial consultations; • Intra-ministerial clearance of legal drafts; • Monitoring, evaluating, and reporting the achievements and shortcomings of policies. The procedures for responding to strategic documents will ensure that ministries are able to identify, and effectively communicate to, the government priorities within their competence, in response to draft strategic documents. They will also ensure that ministries analyze the approved strategic documents of the government, respond with their own policy initiatives that conform to the strategy, and contribute to its realization. The procedures for annual policy work planning will ensure that inputs to the government's annual work program take sufficient account of government priorities, especially priorities related to harmonization with EU legislation (e.g., BiH NPAA). These processes must ensure that: • All sectors/ departments within the ministry are involved in determining the ministry's priorities for policy and legislative initiatives in the upcoming year; • There is an internal coordination process to ensure that the overall submission of the ministry is realistic and balanced; and • The ministry has the capacity to adequately fulfil its work plan. 2. Consultations across the levels of government. The issue of consultations across the federal system is important and will benefit from some institutionalization	A consultative group comprising the government secretaries, secretaries of key ministries, the heads of offices for legislation and secretaries of parliaments from the State, and the two Entities and Brčko District, will be convened at the stage of preparing the annual legislative work plan of the BiH CoM. Each level of government will introduce a methodology for impact assessment of legislation.	<p>Introduce impact assessment methodology that proportionally to the significance of the issue under consideration, takes account of the following issues:</p> <ul style="list-style-type: none"> • Budgetary, social, economic, environmental costs and benefits; • Distribution of costs and benefits by different levels of authority in BiH, if such exist; • Distribution of costs and benefits within the population and subgroups; • Possible problems with enforcement, acceptance and compliance; • Possible flaws, contradictions, lack of clarity and gaps in the preliminary draft; and • Undesired side effects. <p>The methodology will reflect the following principles:</p> <ul style="list-style-type: none"> • Policies and acts will relate to government strategic priorities; • Policies and acts will be fiscally achievable; • Policies and acts will be evidence-based; • Policies and acts will be developed through transparent and consultative procedures; • Policies and acts will include implementation plans, to ensure they are efficiently and effectively implemented. 	Governments at all levels	Mid 2009, ongoing	30.06.09	Impact assessment methodology elaborated and approved; DR amended accordingly	100,00	2,50	25,00	25,00	25,00	25,00	2,50				With the support of the EU institutions, in Bosnia and Herzegovina (DEI-Directorate for European Integrations - 4 studies for acceptance of the acquis) started the process of accepting directives of the so called "the new approach", and the application of the Regulatory Impact Assessment – RIA.	
The methodology will be based on the "principle of proportionality": the time, resources and efforts to be invested into impact assessment will be proportionally tailored to the magnitude of the problem being addressed by the policy and/or legal act.																	
Links to UNDP's project on Strengthening the capacity of BiH Governments representatives in Policy-making and Strategy																	
The methodology will include a checklist to provide guidelines to institutions on how to carry out impact assessment.																	
	The checklist will be flexible enough to mirror the "proportionality principle" for instance:																
	<ul style="list-style-type: none"> • A standardized/limited impact assessments is carried out for medium and low priority initiatives contained in the Annual Work Program of respective government; • An extended impact assessment is carried out for all high priority initiatives contained in the Annual Work Program of respective government; and • Impact analysis desirable for high priority initiatives that may entail significant and comprehensive changes in the system (e.g. reform of the tax system, reform of the social security and health systems, etc.), and/or those likely to induce significant costs (e.g. construction of a new highway or dam, etc.). In comparison to extended impact assessment, this impact often requires external professional expertise, sophisticated research, longer timelines, and is therefore costly. 																
	The methodology will specify responsibilities for verifying the relevant statement of the proponent ministry through a formal opinion																
	At each level of government, entrust the overall coordination of impact assessment for important policies and legislation, to a central policy unit of the relevant government. This unit will also be in charge of training arrangements for the staff (including non-legal staff), in individual institutions.

The newly established Fiscal Council currently operates on the basis of the Agreement on Fiscal Council signed by entities, BiH and BD governments. It is considered necessary to strengthen the basis for its existence, and work through a law that will more closely define the work processes of the Fiscal Council, and outline the Fiscal Council bodies and other institutions that will provide it with analytical support.																
The activities under this action are directly linked to the EC Fiscal Policy Support project for BiH. The World Bank/IMF closely monitor the public expenditures at all government levels, and the overall macroeconomic stability.

PF.1.2 Regular preparation of macro-fiscal framework for the whole state																
This is one of the basic analytical documents that are necessary for policy decision-making of any government. Until recently, BiH was lacking such a comprehensive analysis, which severely limited its policy makers in any decision-making process, and made them dependent on foreign assistance in this area. It is necessary to develop a coherent, comprehensive and single framework for the whole country.					Contribution to Action subgroup	25,00	12,50	35,00	25,00	25,00	35,00	17,50	12,50	12,50	17,50

PF.1.3 Regular preparation of Consolidated government account																
The lack of information on the public sector size and its revenues / expenditures presented a lack of basic statistical data on BiH, its public sector, and its impact on overall economy. There is a need to establish consolidated governmental accounts as the main source of consolidated data on the public sector. A tentative precondition for this task is the harmonization of accounting standards within BiH.					Contribution to Action subgroup	25,00	12,50	30,00	25,00	25,00	30,00	15,00	12,50	12,50	15,00

PF.2.1 Medium-term expenditure framework is a process implemented in the whole of BiH																	
<p>Medium-Term Expenditure Framework (MTEF) process introduction begun several years ago in both entities, and in 2005 has been expanded to the BiH level. This process has recently included Brčko District in MTEF preparation.</p> <p>Further improvement of the MTEF requires addition of new elements to the Budget framework paper. BFP needs to have a common macroeconomic and fiscal outlook for all governments, set expenditure limits by budget user, and incorporated common strategic goals of different sectors through line ministries. The BFP drafting process needs to be harmonized; this requires harmonization of budget calendars at all government levels.</p> <p>The current budget process needs to be strengthened by improving the communication between the MF and budget users, especially during budget preparation. Although program-based budgeting will deliver a strong policy-budget link, it is necessary to have institutions set policy priorities during the budget drafting process, for the budget to reflect the policy priorities of the administration.</p> <p>Currently, the manual data entry of budget requests takes too much capacity within the MFs budget departments, and minimizes analytical work. Introduction of an IT module for budget preparation (compatible with the treasury system), would streamline this process, and increase efficiency of the Ministries of Finance.</p> <p>The activities under this action are directly linked to the PKF/DFID's assistance with the MTEF and budget planning processes across all levels of government in BiH. PF.2.2 Transparent expenditure of public funds																
Capital investments are currently budgeted on a yearly basis, making their management and planning more difficult and uncertain. PF.2.3 Inclusion of institution's management in the preparation of BFP and the budget																
Weaknesses in communication between the institution management and the finance unit within institutions, undermine the ability to link institution's policy priorities and the budget. This communication needs to be strengthened in the preparation of BFP, through adequate delivery of information, and inclusion of management staff in the work processes. During the process of budget drafting the communication with budget users needs to be conducted at different levels of authority, in order to ensure the budget proposal truly reflects the needs and priorities of any given sector/institution. It is necessary to strengthen communication between management of institutions and finance units.	Communication can be improved during the drafting of the Mid-Term Expenditure Framework through informing and inclusion of the management in the work. In case of insufficient explanation of the Mid-Term Expenditure Framework, implement a return of requests and raise the discussion to higher level. Establish discussion levels for the budget request – with the finance unit, at the ministerial level and at government level. PF.2.4 Introduction of program-based budgeting in BiH public administration																
Program-based budgeting is a modern budget preparation methodology, which requests institutions to compose their budget on the basis of programs and activities which the institutions plan in the medium-term. This budget methodology will strengthen the linkage between the policy objectives of a sector and its budget (where significant weaknesses have been found). Every budget allocation will ultimately be linked to a policy goal. Program-based budgets are usually linked to national development plans, or similar strategic documents. This objective is long-term, and as a precondition for success, it necessitates capacity building within the Ministries of Finance, and individual institutions. PF.2.6 Introduction of expanded reporting towards the Parliament and public																
The reports currently submitted to Parliament for adoption usually contain expenditure data sheets, and very limited analyses or recommendations for corrective actions. These reports are usually not available to general public, as they are not usually published in the Official gazettes or on MFs' web sites. It is necessary to improve the reporting to the Parliament and the public, by including detailed expenditure analysis, explanations on divergences from the original budget, and follow-up activities engaged in accordance with supreme audit office recommendations. PF.2.8 Improvement of the budget process in FBiH																	
FBiH has the most complicated administrative structure, with three different levels of government. It is necessary to implement mechanisms of fiscal coordination between the three government levels, and to increase the level of consultations about policy impacts (especially when higher government levels are introducing new policies with financial impacts on lower level governments). PF.3.1 Introduction of the accrual accounting model in the public sector																	
Accrual accounting model is a model which is currently applied in the business community. It is generally considered to be the most advanced accounting model. The introduction of this model in the public sector can increase transparency and accountability of the public administration. This is an ambitious objective; not all EU countries have switched to this accounting model. This goal will require significant investment in capacity (both training and IT), and is therefore considered long-term. PF.3.2 Harmonization of accounting standards in BiH																	
In BiH, each government uses its own accounting standards. The harmonization of the accounting standards in BiH is a necessary precondition for the production of the Consolidated government account, and will be prioritized in the near term. 				Date	OVI	Plan	Actual	Planned				Implemented				Documentation basis / comment
After the introduction of the Single Treasury Account at BiH, Entity and Cantonal levels, the technical coordination between different users of the same system was non-existent. Introduction of technical coordination will bring a range of benefits to the public administration: more efficient use of scarce IT resources, as the solutions to technical problems will be shared between different governments; and cost efficiency, as the administrations can jointly approach the supplier of the system, and look for cost benefits that are unobtainable alone. PF.3.5 Improved Treasury operations																
The USAID has recently supported the establishment of the treasury function and the introduction of financial management information systems at entity and sub-entity levels. Although the Treasury system is relatively new, it still requires constant improvement which will lead to increase in its efficiency. The necessary improvements include technical updates of the system, provision of legal basis for some of its operations (e.g. the cash management and liquidity investment function) to service-oriented upgrades – as treasury is essentially a service to the whole administration, and must provide, for example, customer support/help desks. PF.4.1 Preparation of PIFC introduction strategy																			
Introduction of the Public Internal Financial Control (PIFC), is a clear EC requirement in the field of public finance. The PIFC system contains both internal control and internal audit. Its aim is to ensure accountable, transparent, efficient and effective delivery of public services to citizens. The elements of internal control include: control environment, risk assessment, assessment of information and communication, control activities and monitoring. The internal audit is functionally independent, and needs a separate legal basis. The third element of the system is the establishment of a Central Harmonization Unit (CHU), which promulgates standards in this area. The first step in the process of PIFC introduction is to develop a strategy paper that will outline the main elements of the PIFC system, to ensure the implementation of a harmonized PIFC system across all levels of government. This objective requires the formation of a joint working group that will produce harmonized drafts of Internal Audit (IA) legislation for BiH, entities and BD. The law will specify the model of IA to be introduced - centralized, decentralized, or an appropriate mix of the two approaches. It is necessary to underline that the introduction of internal audit calls for significant investment in education of internal auditors, as this function is not yet fully developed in the BiH private sector. An institution responsible for certification of internal auditors will be designated (in some countries the Central Harmonization Unit play this role). PF.4.4 Introduction of internal control																
Previously, internal control was sporadically introduced in the public administration. At different levels there are different legal provisions as the basis for its introduction, and making the management of any given institution responsible for its introduction. Entities and BiH have produced action plans for its introduction. The institutions will continue introducing internal control systems based on risks assessment, and tailoring internal control systems to address the particular risks faced by each institution. PF.5.2 Implementation of organizing structure with the capacity building within MoFs																
Each of the reforms outlined in the public finance field calls for either new employment, or significant investment in developing the skills of existing employees. Capacity-building within the Ministries of Finance is of utmost importance to ensure the sustainability of past, ongoing, and future reforms currently endangered by the high mobility of labour from the Ministries of Finance. In particular, it has been noted that the budget sectors within all Ministries of Finance need to be substantially strengthened, following international best practices (e.g. hiring analysts to follow individual sectors). Several donor projects of support will provide support to the administrations in BiH in implementation of the Action Plana. This includes, e.g. support by the European Commission for the programme of training for civil service, as well as support to the CSA on the state level. Project "Public administration reform in BiH on the state and entity level" which is financed by the DFID, which is implemented by the National School of Government of the United Kingdom, provides support to the Republic of Srpska, as well as on the level of whole BiH, for development of modern and harmonised approach to the HER. The UNDP assists in harmonising and modernising practice of institutions in relation with human potentials, with the focus, among other things, on the practice of employment, including the work evaluation, together with the suitable training. The UNDP also provides assistance to the CSA FBiH.

AP.1. Administrative simplification strategy																
AP.1.1 Countrywide Administrative simplification strategy																
Administrative procedures are at the core of the relations between the administration and the public that it serves. The Laws on Administrative Procedures (LAPs) originate within a strong legal tradition. However, the quality of administrative decision-making is often undermined by inadequate organization and resources, and an excessively complex administrative decision-making system, which results in undue burdens to the parties. The primary challenge is to develop the administrative decision-making practices to be more client-oriented. For example, in other countries, programs for improving public service delivery foresee: increased application of IT within the administration; introduction of electronic communications between the administration and the parties; registration of special administrative procedures to reduce and rationalize implementation processes; systematic application of simplification measures to key procedures (e.g. one-stop shops for businesses and citizens); certification and professional training of staff involved in administrative-decision making; and application of quality management models.				Contribution to Action Subgroup	100,00	5,00	100,00	100,00	100,00	100,00	5,00	5,00	5,00	5,00

	AP.2.2 General principles of administrative action																
Matters that are not classic administrative cases, such as the rights of clients in relation to service providers, remain potentially uncovered by LAPs. In these cases, a number of institutions selectively apply individual aspects of the respective LAP by analogy. To avoid this selective application based on disputable comparisons, some minimal procedural requirements (applicable to a broader range of subjects, such as service providers etc.), need to be identified, and included in the general administrative law. AP. 2.3 Delegation of decision-making power																
All administrative decisions in BiH tend to be formally determined by the head of an institution, who retains responsibility for the entire decision-making process. A portion of relevant responsibilities can be delegated to subordinates, but the extent this is possible varies under each LAP. Usually, only preparatory activities prior to the final decision are delegated, while in practice the assumption still prevails that all decisions are formally taken by the head of the organization. The practice of delegation will be introduced at all levels, allowing transfer of responsibility for administrative decisions to the level of senior officials, who are the only officials with the time and competence to weigh individual cases. Practice in the EU Member States has also proceeded in this direction.					Contribution to Action Subgroup	10,00	0,00	10,00	10,00	10,00	10,00	0,00	0,00	0,00	0,00

LAPs at all levels will explicitly allow for delegation of responsibility for administrative decisions from the head of the institution to subordinate staff.	WG for Harmonization of LAPs will analyze and suggest concrete solutions to regulate delegation of jurisdiction over preparation and signing of legal acts.	BiH MoJ FBIH MoJ, RS MALSG, BD Government Others:CoM BiH Governments, Parliaments	end 2007.	31.12.07	Proposals submitted by harmonization WG	60,00	0,00	15,00	15,00	15,00	15,00					
	In implementing the relevant provisions, the delegations to senior officials (e.g. heads of sectors), will be actively encouraged.	All institutions with administrative decision-making powers	Ongoing		50% of the respective institutions have changed their Procedures delegating additional decision responsibilities to senior officers	40,00	0,00	10,00	10,00	10,00	10,00					
AP.2.4 Obligation of the first instance decision maker to take the decision																
One of the most frequent problems with respect to administrative decision-making is timeliness of decisions, i.e., the procedure is very lengthy, and deadlines for administrative decision-making set in LAPs and material legislation are not honoured. This is exacerbated by lengthy process of appeals and referrals.					Contribution to Action Subgroup	15,00	0,00	20,00	20,00	20,00	15,00	0,00	0,00	0,00	0,00	
In cases where administration fails to provide a formal decision, as a general rule, LAPs recognize non-decision as a "negative decision"; triggering the right of the party to file an appeal to the second instance body. Such appeals usually result in a referral to the first instance decision-maker. This process indicates that the party can eventually compel the administration to provide a formal decision, but not in the most time-effective manner.																
Problems of the sort described above, require re-examination of the classic approach that considers administrative silence as a negative response. In other countries, "silent assent" in administrative procedure is increasingly being introduced. It is being used either as a technique to exercise greater pressure on the deciding administration, or as an administrative simplification measure, decreasing the bureaucratic burden on citizens and businesses, especially in cases concerning authorization requests to the administration, which are unlikely to affect the rights and interests of third parties. In Italy, for example, LAP introduced a presumption that silence signifies consent, unless otherwise specifically stated in material legislation. In other cases, the party may be authorized to respond to administrative silence through direct judicial recourse.

AP.2.5 Bringing second instance decisions on merits																

				Date		Plan	Actual	Planned				Implemented				Documentation basis/ comment
Appellate bodies very frequently fail to decide the cases based on their merits. These bodies limit their intervention to invalidating the original decision on procedural grounds, returning the case to the first instance body for further determination. LAPs do not set any limit to the possibility for the appellate authority to return the case to the first instance body, which can result in the case being sent back and forth several times. Also, there appears to be a normative gap, since the appellate authority is not mandated to decide a case on merits, if the appeal authority has already noted problems with the first instance decision at an earlier stage. In Austria, a second instance authority decides the matter directly on the basis of the file, and when the gathering of evidence is completed, it can either remit the case to a lower instance for a new hearing, or it can hold the hearing directly. AP.3.1 Central registries of procedures																
The specific authority of an administrative body to make different types of decisions (e.g., decisions conferring certain benefits), is always prescribed in material legislation, regulating the subject matter that the institution decides upon. Maintaining registers of the various procedures in the administration can be particularly helpful for obtaining insights into existing arrangements, deciding on the optimal allocation of new responsibilities, and rationalization of existing ones. A central registry of procedures was created in Slovenia, and today it is an important tool for fostering administrative simplification. AP.4.1 Improved information sharing																
administrations in BiH are gradually entering a process of integration of basic registries (the essential databases whose constitution is in the potential interest of all institutions); such as the country-wide registry of residents produced in the framework of CIPS project. However, it appears that the advantages of these registries are not shared with other administrations, which usually have no direct access to this country-wide data. AP.4.2 Electronic communication with parties																
The four LAPs are based on outdated concepts where communication between administration and various parties can only take place via the postal system, or face-to-face interaction. Electronic communication with the parties can be an advantage given the physical and administrative fragmentation of BiH, and LAPs will be amended regarding this point. In Estonia, LAP provides for documents to be sent to an e-mail address indicated in the application, with a digital signature. In Slovenia, parties can submit electronic requests to a central information system, which confirms receipt and passes the file to the responsible organ. The Austrian LAP allows written materials to be communicated by e-mail or in any other technical device, if the party consented to this mode of communication. Apart from actual decision-making in its various instances, the current legislation covers other administrative functions to a very limited extent. <p>The approach to professional competence guaranteed in LAPs is not sufficient to ensure a high level of service. Specialist knowledge considerably varies from institution to institution, with an uneven understanding of key aspects of administrative decision-making. Each LAP mentions adequate performance on special exams as one of the key requirements for officials dealing with tasks related to administrative decision-making. This system could be developed into a proper system of certification for all key staff involved in AP matters. Furthermore, it would be necessary to deploy specific in-service training, considering that officials responsible for conducting the procedure or executing individual activities within it are primarily non-lawyers. Slovenia has taken a serious approach to ensuring professionalism in administrative decision-making, through professional rehabilitations, which consist of attending courses and passing an exam. AP.6.2 Disciplinary responsibility																
Across all government levels, very few disciplinary actions, or actions for material responsibility are conducted against officials for misuse of position, or for serious mistakes committed during the procedure. On the other hand, there are a number of complaints addressed to administrative inspectors and ombudsman institutions; and the large number of procedures indicates that there was a need for disciplinary sanctions. Therefore, each relevant institution will specifically report on disciplinary measures undertaken for breach of procedures; this will be included in regular reports on decision-making practices. AP.7.1 Develop the role of administrative inspection																
<p>Developing the role of administrative inspection will be treated as a priority. Currently, no Rulebook or standard procedure determines the inspection methodology. Recorded rules would be an advantage to both inspectors and inspected parties: to better understand what the inspection implies.</p> <p>There is a strong need to employ additional numbers of administrative inspectors, particularly at the State level, since State-level legislation is theoretically where the range of powers provided to inspectors is widest and strongest. Additionally in FBiH, the Administrative Inspectorate is organized in a centralized manner, which considerably reduces the likelihood of frequent and efficient inspections of headquarters. It makes coordination with the separate Cantonal-level administrative inspectors very difficult. In the BD, the role of administrative inspector is limited to one employee from the Public Safety Department. This is a highly unusual solution, and will be revised.</p>					Contribution to Action Subgroup	100,00	50,75	100,00	100,00	100,00	100,00	24,44	16,67	70,00	79,23

1. Focus the role of administrative inspection more strongly on administrative decision-making (the application of LAPs), and quality of services to the public.	If necessary, make necessary changes to the mandate of administrative inspection. Inspectors to act not only on the basis of individual complaints, but also on the basis of planned checks on all aspects of the procedure, including standards of service to the parties	Competent ministries on all levels	By mid 2008	30.06.08	New mandate and regulations for inspections submitted	20,00	10,00	5,00	5,00	5,00	5,00	2,50	2,50	2,50	2,50	This measure is implemented by 50% on all levels of government as the role and activities of the administrative inspection are prescribed by the law and inspectors in their regular activities are verifying compliance of the LAPs. Documentation basis: existing LAPs of BiH, FBiH, RS and BD. Drafting of the Law on Administrative Inspection in RS is in progress.
2. Improve capacities for administrative inspection.	Review and establish effective organizational arrangements for the work of administrative inspection, including necessary decentralization arrangements (especially at the FBiH level).	All, especially FBiH and cantonal governments	By mid 2008	30.06.08	Updated organizational arrangements established	20,00	10,00	5,00	5,00	5,00	5,00			5,00	5,00	This measure is completely implemented in BD and RS. IT 1. General policies, regulations and standards																	
IT.1.1 Bring legal framework in line with the acquis communautaire requirements in the area of IT																	
Despite significant progress made in the field of IT legislation, the existing IT legislation remains haphazard and piecemeal, distancing BiH from acquis communautaire requirements, and the needs of a modern information society. An urgent need for a coherent and comprehensive regulatory environment for the utilization of IT has been identified; the IT legal framework needs to be in line with the acquis communautaire requirements.					Contribution to Action subgroup	20,00	8,48	20,00	20,00	20,00	20,00	20,00	8,16	8,00	9,76	8,00

IT.1.2 Implement e-government action plan																	
The e-government strategy and accompanied Action Plan, adopted by the BiH Council of Ministers in November 2004, provide strategic directions and guidelines for activities needed during the implementation of e-government, at all governmental levels. These documents offer a comprehensive catalogue of potential actions, and explore a wide range of technologies that could be deployed and actions that could be taken; depending on political willingness, technical capacity, and available funds. The proposed IT projects need to be prioritized based on: a realistic view of the existing capacity and performance; strong political will regarding their implementation; and sustainable project cost models – so necessary resources can be secured for their implementation.					Contribution to Action subgroup	20,00	2,00	20,00	20,00	20,00	20,00	20,00	0,20	0,00	4,00	2,00

4. Implement the updated action plan according to defined priorities.			Interim results by end 2010	31.12.10	90% of results of action plan implemented in time (31.12.08=10%, 09=10%, 10=5%)	25,00	2,50	6,25	6,25	6,25	6,25			2,50		
IT.1.3 Develop software strategy applicable to the whole public sector																
To maintain competition in the software market, and ensure that the authorities can choose the software on the "good and cheap" principle – regardless whether the software is open source or proprietary – it is necessary to develop and adopt a software strategy for public administration as whole. Regarding proprietary software, commenced negotiations must continue for the whole public sector country-wide (regardless of the governmental level), to achieve a considerable reduction in the cost of licenses on the basis of enterprise agreement licenses. In parallel, following the practices of developed countries, the possibilities of migration to open source software and the use of so called mixed models will be seriously considered. IT.1.5 Develop IT security policy and set up a continuous process of risk analysis																		
The most important precondition for secure electronic data exchange and the electronic delivery of government services is security. There is a need to have a security and privacy policy in place, and a method of monitoring staff adherence to this policy. Security policy will encompass defined technical recommendations, conditions and referent standards, to ensure secure data and information exchange within and between government and users of public services. A continuous process of risk analysis will be established at all levels.					Contribution to Action subgroup	20,00	1,00	20,00	20,00	20,00	20,00	0,00	0,00	0,00	4,00

IT.2.1 Establish Central IT Units for information society																		
Unlike other horizontal systems in public administration, a dedicated central institution in charge of IT coordination is still absent at most government levels, and country-wide. The future Agency for Information Society (AIS) is supposed to be the main initiator and implementer of proposed ICT activities. Therefore, it is of utmost importance to compromise and agree on roles, responsibilities and functions of the future AIS; and make it operational in the shortest period possible. Centres of IT competence will be established and/or formally recognized at other levels, and will create close formal links of cooperation with the state-level AIS as soon as it is established. IT.2.2 Optimize the allocation and use of the limited staffing resources																
Once the AIS is established, the allocation and use of the limited staffing resources must be optimized. A clear division between centralized and decentralized IT functions, and IT functions that could be outsourced to private companies, will be done. At the same time, individual institutions will do their best to keep at least minimal in-house IT capacity. IT.2.8 Increase computer literacy of civil servants																

				Date	OVI	Plan	Actual	Planned				Implemented				Documentation basis / comment	
It is obvious that increased levels of computer literacy of civil servants reduces the need for IT help desk support: having computer literate civil servants is a precondition toward the overall goal of enhancing efficiency. At each level, computer literacy testing of all existing employees will be performed, and one institution will be responsible for continuous work on IT literacy, organizing a standardized training programme (such as the ECDL programme), introducing e-Learning, performing IT literacy benchmarking, and raising awareness of the importance of self-training. To reduce the high costs of IT training, all newly-employed staff will be required to have basic computer skills, and CSAs will introduce rules on the minimum computer literacy required for civil servants. IT.3.1 Establish a national backbone for the use of public administrations																	
Coherent communication and information infrastructure that will provide cheap, reliable and safe access to information and allow information exchange; both within the public sector (including across government levels), and externally, between the public sector and the users of public services; is a major precondition, without which the potential of e-governance cannot be achieved. Correct infrastructure is critical for the development and implementation of information systems and specialized applications, in all areas of the administration. To achieve this, governments at all levels must prioritize the development of this infrastructure, and sufficient budget resources will be secured for this purpose. Initially, early coordination of all involved stakeholders, in order to avoid any duplication of efforts will be established. Further, analysis of current networks will be performed to optimize the use of existing networks, and avoid irrational spending. IT.3.2 Improve horizontal and vertical networking within the administration																
In parallel with the development of a national backbone for the use of public administrations, individual LANs will be completed, and the infrastructure for single and ubiquitous access to the Internet (with joint services and security solutions), will be ensured wherever possible. IT.3.4 Establish standard workstation configuration																	
Well-organized and standardized infrastructure is much easier for maintenance; the standardization of configurations is an obvious measure to save scarce funds and improve user satisfaction. IT.4.2 Establish e-government interoperability framework																
Current EC trends regarding the interconnectivity, data exchange and service delivery of public sector IT systems are based on interoperability, rather than integration of IT systems. Therefore, the work on the IT interoperability framework for the BiH public sector, harmonized with the recently published European Interoperability Framework (EIF), will become a long-term priority. Common, open standards for data exchange and technical interoperability between applications (most likely XML-based), will also be produced as soon as possible by the future AIS. IT.4.3 Develop a strategy on public registers and implement it																
This strategy, supported by the analyses of the existing partial electronic registers, will be developed enclosing the solutions for harmonization and interoperability of public registers. The priority list will be created, and for each public register, unified software solutions will be implemented if possible. Following the strategy, integration and interconnection of registers and other important data collections will continue to provide better quality data to support public administrative functions, and simultaneously decrease the burden on citizens caused by the obligation to collect data. The final achievement will be one-stop-shop for citizens.					Contribution to Action subgroup	20,00	0,50	20,00	20,00	20,00	20,00	0,00	0,00	0,00	2,00

IT.4.4 Uniformly implement information systems supporting common horizontal functions																	
The same software solution can automate common procedures in most of the institutions, initiate large budget savings, and avoid duplication of effort and future interoperability problems. Therefore, the budget for development and implementation of uniform software solutions supporting common horizontal functions will be secured as soon as possible. The implementation will be in accordance with agreed priorities, and in close cooperation with the institutions playing a central implementing role at each government level. Once implemented, versions of the same information systems in all institutions will be kept synchronized, configuration management will be introduced, common vocabulary and data definitions will be maintained, and a common knowledge repository for problem-solving during migration and maintenance will be made. IT.5.2 Establish e-government benchmarking process																
The existing benchmarking systems to measure the advancement of IT use in government focus on the front-office component, (i.e. percentage of basic public services available online and use of online public services by the public, in line with the e-Europe 2005 requirements), necessitate that the development of online public services must be complemented by back-office reorganization. The additional benchmarking system will be focused on how government, its various agencies and back offices, will be adapting and reorganizing to meet the challenges and opportunities presented by IT. Based on the practice of other countries, statistical parameters of e-governance development and the manner of data collection and progression recording will be defined.
