| PF.1.2 Regular preparation of macro-fiscal framework for the whole state |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| This is one of the basic analytical documents that are necessary for policy decision-making of any government. Until recently, BiH was lacking such a comprehensive analysis, which severely limited its policy makers in any decisionmaking process, and made them dependent on foreign assistance in this area. It is necessary to develop a coherent, comprehensive and single framework for the whole country. |  |  |  |  | Contribution to Action subgroup | 25,00 | 12,50 | 35,00 | 25,00 | 25,00 | 35,00 | 17,50 | 12,50 | 12,50 | 17,50 |  |

| PF.1.3 Regular preparation of Consolidated government account |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| The lack of information on the public sector size and its revenues / expenditures presented a lack of basic statistical data on BiH, its public sector, and its impact on overall economy. There is a need to establish consolidated governmental accounts as the main source of consolidated data on the public sector. A tentative precondition for this task is the harmonization of accounting standards within BiH . |  |  |  |  | Contribution to Action subgroup | 25,00 | 12,50 | 30,00 | 25,00 | 25,00 | 30,00 | 15,00 | 12,50 | 12,50 | 15,00 |  |

| PF.2.4 Introduction of program-based budgeting in BiH public administration |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| Program-based budgeting is a modern budget preparation methodology, which requests institutions to compose their budget on the basis of programs and activities which the institutions plan in the medium-term. This budget methodology will strengthen the linkage between the policy objectives of a sector and its budget (where significant weaknesses have been found). Every budget allocation will ultimately be linked to a policy goal. Program-based budgets are usually linked to national development plans, or similar strategic documents. This objective is long-term, and as a precondition for success, it necessitates capacity building within the Ministries of Finance, and individual institutions. |  |  |  |  | Contribution to Action subgroup | 20,00 | 0,00 | 20,00 | 20,00 | 20,00 | 20,00 | 0,00 | 0,00 | 0,00 | 0,00 |  |

| PF.4.3 Introduction of internal audit |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| This objective requires the formation of a joint working group that will produce harmonized dratts of Internal Audit (IA) legislation for BiH, entities and BD. The law will specify the model of IA to be introduced - centralized, decentralized, or an appropriate mix of the two approaches. It is necessary to underline that the introduction of internal audit calls for significant investment in education of internal auditors, as this function is not yet fully developed in the BiH private sector. An institution responsible for certification of internal auditors will be designated (in some countries the Central Harmonization Unit play this role). <br> NB: The authorities have formed an internal audit working group, consisting of senior finance ministry officials from the state, RS and FBH governments, other officials and donors. The group is working toward producing synchronized internal audit laws, the adoption of which will be in line with the Economic Management Structural Adjustment Credit (EMSAC) with the World Bank. |  |  |  |  | Contribution to Action subgroup | 20,00 | 7,75 | 20,00 | 20,00 | 20,00 | 20,00 | 9,00 | 9,00 | 9,00 | 4,00 |  |

| PF.4.4 Introduction of internal control |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| Previously, internal control was sporadically introduced in the public administration. At different levels there are different legal provisions as the basis for its introduction, and making the management of any given institution responsible for its introduction. Entities and BiH have produced action plans for its introduction. The institutions will continue introducing internal control systems based on risks assessment, and tailoring internal control systems to address the particular risks faced by each institution. The standards of internal control need to be harmonized across different government levels. |  |  |  |  | Contribution to Action subgroup | 20,00 | 2,60 | 20,00 | 20,00 | 20,00 | 20,00 | 0,00 | 4,00 | 0,00 | 6,40 |  |

| It is suggested that institutions continue working on introduction and upgrading of their Internal Control systems. The approach to be taken here is to be based on Risk Assessment and drafting of Risk Registers for each institution. Internal Controls are to be introduced as measures to be taken for risk mitigation. | Establishment of the Internal Control system through the realization of action plans for improving Internal Controls at state and entity level. | BiH MoFT; FBiH MoF, Cantonal MoFs, RS MoF, BD (sector responsible for finance) | Short-term | 30.12.06 | Procedure developed and agreed; Regulations / Laws set up or amended | 40,00 | 13,00 | 10,00 | 10,00 | 10,00 | 10,00 |  | 5,00 |  | 8,00 | Rulebook on establishment of internal control in budget users of the BD BiH, Rulebook on internal controls in the Directorate for Finances of the BD BiH, Guidelines of the Mayor on establishment of internal control in the BD BiH - In the FBIH, the Government issued procedures for control and management (internal control) MF of the FBIH guidelines establishment and strengthening of internal controls with budget users. |

| The overall control environment which comprises issues such as overall attitude, awareness, and actions of management and staff, needs to be strengthened. This includes in particular the personal, professional and ethical integrity of management and staff; management's philosophy and operating style; the organizational structure and the methods for assigning and delegating authority and responsibility; and the human resources policies and practices and the commitment to competent staff. These goals will be accomplished jointly with the reforms included in the Human Resources component. |  |  |  |  | Contribution to Action subgroup | 20,00 | 6,00 | 20,00 | 20,00 | 20,00 | 20,00 | 8,00 | 0,00 | 8,00 | 8,00 |  |

| PF.5.2 Implementation of organizing structure with the capacity building within MoFs |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| Each of the reforms outlined in the public finance field calls for either new employment, or significant investment in developing the skills of existing employees. Capacity-building within the Ministries of Finance is of utmost importance to ensure the sustainability of past, ongoing, and future reforms currently endangered by the high mobility of labour from the Ministries of Finance. In particular, it has been noted that the budget sectors within all Ministries of Finance need to be substantially strengthened, following international best practices (e.g. hiring analysts to follow individual sectors). |  |  |  |  | Contribution to Action subgroup | 33,00 | 3,14 | 33,00 | 33,00 | 33,00 | 33,00 | 0,00 | 0,00 | 0,00 | 12,54 |  |

Salaries are a common problem to all levels. This is exacerbated by competition form the private sector for he best and the brightesti, and budget limitations. The opportunity to compete for salary increases (i.e. dominates compensation. Similarly, more senior staff will derive greater satisfaction when salary ranges dominates compensation. similiary,
correspond to the complexity of tasks.

The need for revision of the pay and grading system was agreed between the BiH government and the World Bank as part of the commitments under EMSAC. These commitments include the need to introduce pay grade structures with salary scales harmonized with the job categories established by the civil service aws and other relevant legislation; the clear definition of criteria to allocate position and staff within a salary grade; the clear definition of rules for the modification of the salary grades; the definition of rules
governing salary increase in line with performance assessments established by the civil service laws and governing salary increase in line with performance assessments established by the civil service laws and
other relevant legislation; the replacement of the coefficient and minimum price of labor system by a sing base wage; the reduction in the number of allowances from the current system, through the inclusion of such allowances as the hot meal or the holiday allowances in the base wage

There have been several reviews by donors (Word Bank, DFiD) that have made specific recommendations. There are already dratts for new salary legislation, in RS and at the level of BiH.

| Matters that are not classic administrative cases, such as the rights of clients in relation to service providers, remain potentially uncovered by LAPs. In these cases, a number of institutions selectively apply individual aspects of the respective LAP by analogy. To avoid this selective application based on disputable comparisons, some minimal procedural requirements (applicable to a broader range of subjects, such as service providers etc.), need to be identified, and included in the general administrative law. |  |  |  |  | Contribution to Action Subgroup | 10,00 | 0,00 | 10,00 | 10,00 | 10,00 | 10,00 | 0,00 | 0,00 | 0,00 | 0,00 |

| AP. 2.3 Delegation of decision-making power |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| All administrative decisions in BiH tend to be formally determined by the head of an institution, who retains responsibility for the entire decision-making process. A portion of relevant responsibilities can be delegated to subordinates, but the extent this is possible varies under each LAP. Usually, only preparatory activities prior to the fina decision are delegated, while in practice the assumption still prevails that all decisions are formally taken by the head of the organization. The practice of delegation will be introduced at all levels, allowing transfer of responsibility for administrative decisions to the level of senior officials, who are the only officials with the time and competence to weigh individual cases. Practice in the EU Member States has also proceeded in this direction. |  |  |  |  | Contribution to Action Subgroup | 10,00 | 0,00 | 10,00 | 10,00 | 10,00 | 10,00 | 0,00 | 0,00 | 0,00 | 0,00 |

| LAPs at all levels will explicitly allow for delegation of responsibility for administrative decisions from the head of the institution to subordinate staff. | WG for Harmonization of LAPs will analyze and suggest concrete solutions to regulate delegation of jurisdiction over preparation and signing of legal acts. | BiH MoJ FBiH MoJ, RS MALSG BD Government Others:CoM BIH Governments, Parliaments | End of 2007 | 31.12 .07 | Proposals submitted by harmonization WG | 60,00 | 0,00 | 15,00 | 15,00 | 15,00 | 15,00 |  |  |  |  |
|  | In implementing the relevant provisions, the delegations to senior officials (e.g. heads of sectors), will be actively encouraged. | All institutions <br> with <br> administrative <br> decision-making <br> powers | Ongoing |  | $50 \%$ of the <br> respective <br> institutions have <br> changed their <br> Procedures <br> delegating <br> additional decision <br> responsibilities to <br> senior officers | 40,00 | 0,00 | 10,00 | 10,00 | 10,00 | 10,00 |  |  |  |  |
| AP.2.4 Obligation of the first instance decision maker to take the decision |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| One of the most frequent problems with respect to administrative decision-making is timeliness of decisions, i.e., the procedure is very lengthy, and deadlines for administrative decision-making set in LAPs and material legislation are not honoured. This is exacerbated by lengthy process of appeals and referrals. <br> In cases where administration fails to provide a formal decision, as a general rule, LAPs recognize non-decision as a "negative decision"; triggering the right of the party to file an appeal to the second instance body. Such appeals usually result in a referral to the first instance decision-maker. This process indicates that the party can eventually compel the administration to provide a formal decision, but not in the most time-effective manner. |  |  |  |  | Contribution to Action Subgroup | 15,00 | 0,00 | 20,00 | 20,00 | 20,00 | 15,00 | 0,00 | 0,00 | 0,00 | 0,00 |
| Problems of the sort described above, require re-examination of the classic approach that considers administrative silence as a negative response. In other countries, "silent assent" in administrative procedure is increasingly being introduced. It is being used either as a technique to exercise greater pressure on the deciding administration, or as an administrative simplification measure, decreasing the bureaucratic burden on citizens and businesses, especially in cases concerning authorization requests to the administration, which are unlikely to affect the rights and interests of third parties. In Italy, for example, LAP introduced a presumption that silence signifies consent, unless otherwise specifically stated in material legislation. In other cases, the party may be authorized to respond to administrative silence through direct judicial recourse. |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |

| AP.2.5 Bringing second instance decisions on merits |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| Appellate bodies very frequently fail to decide the cases based on their merits. These bodies limit their intervention to invalidating the original decision on procedural grounds, returning the case to the first instance body for further determination. LAPs do not set any limit to the possibility for the appellate authority to return the case to the first instance body, which can result in the case being sent back and forth several times. Also, there appears to be a normative gap, since the appellate authority is not mandated to decide a case on merits, if the appeal authority has already noted problems with the first instance decision at an earlier stage. In Austria, a second instance authority decides the matter directly on the basis of the file, and when the gathering of evidence is completed, it can either remi the case to a lower instance for a new hearing, or it can hold the hearing directly. |  |  |  |  | Contribution to Action Subgroup | 15,00 | 0,00 | 20,00 | 20,00 | 20,00 | 15,00 | 0,00 | 0,00 | 0,00 | 0,00 |

| administrations in BiH are gradually entering a process of integration of basic registries (the essential databaseswhose constitution is in the potential interest of all institutions); such as the country-wide registry of residents produced in the framework of CIPS project. | The four LAPs are based on outdated concepts where communication between administration and various parties can only take place via the postal system, or face-to-face interaction. Electronic communication with the parties can be an advantage given the physical and administrative fragmentation of BiH, and LAPs will be amended regarding this point. In Estonia, LAP provides for documents to be sent to an e-mail address indicated in the application, with a digital signature. In Slovenia, parties can submit electronic requests to a central information system, which confirms receipt and passes the file to the responsible organ. The Austrian LAP allows written materials to be communicated by e-mail or in any other technical device, if the party consented to this mode of communication. |  |  |  |  | Contribution to Action Subgroup | 50,00 | 0,00 | 50,00 | 50,00 | 50,00 | 50,00 | 0,00 | 0,00 | 0,00 | 0,00 |

| Apart from actual decision-making in its various instances, the current legislation covers other administrative functions to a very limited extent. Achieving real improvements in administrative decision-making requires more than the precise application of existing legislation. | AP.5.2 Professional qualifications of staff |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| The approach to professional competence guaranteed in LAPs is not sufficient to ensure a high level of service. Specialist knowledge considerably varies from institution to institution, with an uneven understanding of key aspects of administrative decision-making. Each LAP mentions adequate performance on special exams as one of the key requirements for officials dealing with tasks related to administrative decision-making. This system could be developed into a proper system of certification for all key staff involved in AP matters. Furthermore, it would be necessary to deploy specific in-service training, considering that officials responsible for conducting the procedure or executing individual activities within it are primarily non-lawyers. Slovenia has taken a serious approach to ensuring professionalism in administrative decision-making, through professional habilitations, which consist of attending courses and passing an exam. This approach is applied to administrative inspectors and officials deciding administrative cases. In addition, there are professional upgrading courses forAP specialists carrying out analytical tasks on decision-making practices within their institutions, and practical training for front desk employees. |  |  |  |  | Contribution to Action Subgroup | 60,00 | 19,20 | 60,00 | 60,00 | 60,00 | 60,00 | 19,20 | 19,20 | 19,20 | 19,20 |

| To maintain competition in the software market, and ensure that the authorities can choose the software on the "good and cheap" principle - regardless whether the software is open source or proprietary - it is necessary to develop and adopt a software strategy for public administration as whole. Regarding proprietary software, commenced negotiations must continue for the whole public sector country-wide (regardless of the governmental level), to achieve a considerable reduction in the cost of licenses on the basis of enterprise agreement licenses. In parallel, following the practices of developed countries, the possibilities of migration to open source software and the use of so called mixed models will be seriously considered. |  |  |  |  | Contribution to Action subgroup | 20,00 | 6,85 | 20,00 | 20,00 | 20,00 | 20,00 | 5,00 | 5,00 | 5,00 | 12,40 |  |

| Unlike other horizontal systems in public administration, a dedicated central institution in charge of IT coordination is still absent at most government levels, and country-wide. The future Agency for Information Society (AIS) is supposed to be the main initiator and implementer of proposed ICT activities. Therefore, it is of utmost importance to compromise and agree on roles, responsibilities and functions of the future AIS; and make it operational in the shortest period possible. Centers of IT competence will be established and/or formally recognized at other levels, and will create close formal links of cooperation with the state-level AIS as soon as it is established. |  |  |  |  | $\begin{aligned} & \hline \text { Contribution to } \\ & \text { Action subgroup } \end{aligned}$ | 10,00 | 2,50 | 10,00 | 10,00 | 10,00 | 10,00 | 2,00 | 2,00 | 2,00 | 4,00 |  |

| Once the AIS is established, the allocation and use of the limited staffing resources must be optimized. A clear division between centralized and decentralized IT functions, and IT functions that could be outsourced to private companies, will be done. At the same time, individual institutions will do their best to keep at least minimal in-house IT capacity. | It is obvious that increased levels of computer literacy of civil servants reduces the need for IT help desk support having computer literate civil servants is a precondition toward the overall goal of enhancing efficiency. At each level, computer literacy testing of all existing employees will be performed, and one institution will be responsible for continuous work on IT literacy, organizing a standardized training programme (such as the ECDL programme), introducing e-Learning, performing IT literacy benchmarking, and raising awareness of the importance of self-training. To reduce the high costs of IT training, all newly-employed staff will be required to have basic computer skills, and CSAs will introduce rules on the minimum computer literacy required for civil servants. Cooperation with the faculties and students of e-Gov laboratories will be maintained. |  |  |  |  | Contribution to Action subgroup | 20,00 | 7,10 | 20,00 | 20,00 | 20,00 | 20,00 | 4,00 | 6,00 | 10,40 | 8,00 |  |

| IT.3.1 Establish a national backbone for the use of public administrations |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| Coherent communication and information infrastructure that will provide cheap, reliable and safe access to information and allow information exchange; both within the public sector (including across government levels), and externally, between the public sector and the users of public services; is a major precondition, without which the potential of egovernance cannot be achieved. Correct infrastructure is critical for the development and implementation of information systems and specialized applications, in all areas of the administration. To achieve this, governments at all levels must prioritize the development of this infrastructure, and sufficient budget resources will be secured for this purpose. Initially, early coordination of all involved stakeholders, in order to avoid any duplication of efforts will be established. Further, analysis of current networks will be performed to optimize the use of existing networks, and avoid irrational spending. |  |  |  |  | Contribution to Action subgroup | 20,00 | 6,20 | 20,00 | 20,00 | 20,00 | 20,00 | 0,00 | 0,00 | 4,80 | 20,00 | It is necessary to question the need of establishing separate physical network for public administration envisaged in the Strategy. |

| In parallel with the development of a national backbone for the use of public administrations, individual LANs will becompleted, and the infrastructure for single and ubiquitous access to the Internet (with joint services and security solutions), will be ensured wherever possible.
